**Check measurements** of combined multiple pieces before splitting apart.

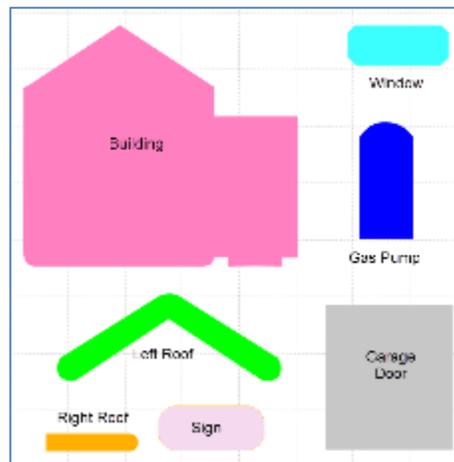

**The following are the true-size measurements.** You will need to add an inflation value (shadow/offset) before cutting the fabric for the applique. The satin stitch is 3mm wide, so I suggest starting at 1.4mm extra around each piece. Adjust as needed.

If the pieces do not come into your cutting software at true size, try the alternate file **Garage\*\_72**. Silhouette and Cricut seem to like it better.
